

ProSCAN: Cloud-Based IT Security and Compliance

Overview:

Proficio ProSCAN is a cloud based security solution that provides vulnerability management, web application scanning services, and facilitates in PCI compliance.

Key Advantages:

- Always-on solution that continuously is scanning for vulnerabilities
- Requires no installation or hardware maintenance
- Provides web application scanning that accurately identifies OWASP Top 10 Risks
- Scans for SQL Injection, XSS, CSRF, and URL redirection
- Assists in PCI compliance
- Includes customizable alerting and reporting accessible from the customer portal
- Reduces security and network operations cost by freeing up the customer's security engineering resources
- Offered as an add-on to Proficio ProSOC monitoring and alerting service
- Provided in partnership with the market leader for vulnerability management, Qualys

ProSCAN is an easy-to-use, cloud-based service that provides organizations with the most advanced technology to monitor and scan their critical assets, without adding headcount or costly software and hardware systems.

ProSCAN Powered by Qualys

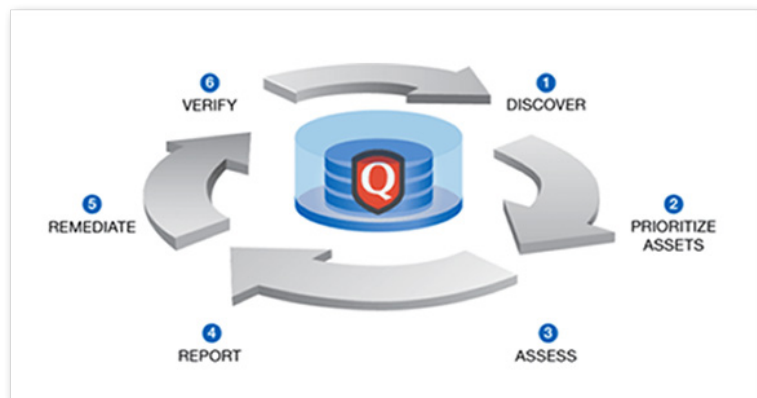

ProSCAN is powered by QualysGuard, the Qualys Cloud Platform. It includes solutions for the following security services:

- Vulnerability Management
- Web Application Scanning
- PCI Compliance

Industry Leading Vulnerability Management

ProSCAN is powered by Qualys Vulnerability Management (VM), the market leader in vulnerability management. The solution gives you immediate, global visibility into where your IT systems might be vulnerable to the latest Internet threats and how to protect them.

ProSCAN continuously discovers and monitors your assets, and identifies critical vulnerabilities in computers, servers, and other devices. It is deployed rapidly, and has unparalleled accuracy and scalability.

ProSCAN assists customers in applying patches, and in verifying that the patches have been properly implemented in a timely manner.

ProSCAN also provides comprehensive reports on vulnerabilities including severity levels, time to fix estimates and impact on business, plus trend analysis on security issues.

New signatures are continuously added to the knowledge-base in the Qualys cloud, providing customers with an on-going, up-to-date vulnerability management solution.

Web Application Scanning

ProSCAN Web Application Scanning is an easy-to-use, very accurate and highly automated solution that crawls websites and web applications, performs assessments, and provides reports. ProSCAN Web Application Scanning includes:

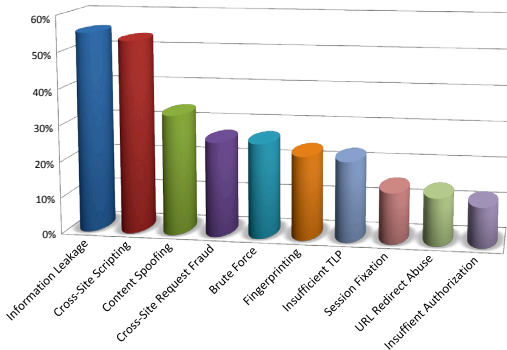

- Web Application and Link Discovery
- Proactive Malware scanning
- Authentication support – HTTP Basic, Digest and NTLM server-based authentication and simple form authentication
- Black and White Lists
- Bandwidth Control to prevent impact on application performance
- Search for Sensitive Content including SSN's and Credit Card Data
- Accurate OWASP Top 10 Coverage

Making PCI Compliance Easy

ProSCAN PCI Compliance enables merchants and Member Service Providers to promptly complete a PCI ASV Scan. ProSCAN PCI Compliance includes a self-assessment questionnaire and enables users to conduct network and web application security scans to efficiently identify and eliminate security vulnerabilities. The "auto submission" feature completes the compliance process, allowing users to submit compliance status to one or multiple acquiring banks. The ProSCAN service also meets the PCI requirement to retain full logs for 12 months and review event logs daily.

Prevalance of Vulnerabilities on Tested Websites

About Proficio

Proficio is a leading provider of cloud-based security solutions. We are changing the way organizations defend against advanced threats and prevent security breaches by providing the most powerful cloud-based services without the need for added headcount or costly software and hardware systems. Proficio's ProSOC service logs, monitors and analyzes organizations' security events and provides actionable threat notifications and responsive breach prevention actions. Staffed 24x7 by security experts and using industry leading SIEM and Active Defense technology, ProSOC enables organizations to address critical security and compliance needs, prevent data breaches, and reduce operations costs. Our customers value our insight, experience and unrelenting passion for defending their networks and applications from cyber attacks.

Easy-to-Use Portal

ProSCAN includes a secure web-based portal that provides customers a real time summary of the state of their security. Graphical dashboards are fully customizable and users can drill down to see the full context of an event.

1 Year Event Log Retention

ProSCAN retains full event logs for one year in our online cloud-based infrastructure. We also retain security events of interest for 7 years. Event logs are stored in an easy-to-understand normalized format and are available at the click of a mouse.

Experts at Work for You

Proficio has assembled a team of security, SIEM, and SOC experts to deliver a world-class service. Our experts are exceptionally skilled in configuring SIEM systems and correlation rules to identify the most relevant critical security alerts. Proficio offers our ProSOC customers 24x7 access to certified security analysts.

"We are under pressure to address increasing security threats and mounting compliance requirements without making CAPEX expenditures or hiring additional IT security experts. ProSCAN is the most cost effective way to meet our monitoring, logging, and scanning requirements all in one simple cloud-based service."
